Our Research on Mobile Ad Hoc Networks

by

Dr. Jie Li
Professor
Graduate of Systems & Information Engineering
University of Tsukuba
Japan

Date : 12 March, 2010 (Friday)
Time : 11:00am - 12:00noon
Venue : Room 833, Ho Sin Hang Engineering Building
        The Chinese University of Hong Kong

Abstract

In this talk, we will introduce some of our research work on mobile ad hoc and sensor networks which includes the trust management and cross-layer design in mobile ad hoc networks.

Biography

Professor Li received the B.E. degree in computer science from Zhejiang University, Hangzhou, China, the M.E. degree in electronic engineering and communication systems from China Academy of Posts and Telecommunications, Beijing, China. He received the Dr. Eng. degree from the University of Electro-Communications, Tokyo, Japan. He has been with University of Tsukuba, Japan, where he is currently a Professor. His research interests are in mobile distributed multimedia computing and networking, network security, modeling and performance evaluation of information systems. He is a senior member of IEEE and ACM, and a member of Information Processing Society of Japan (IPSJ). He has served as a secretary for Study Group on System Evaluation of IPSJ and on several editorial boards for IPSJ Journal, IEEE Transactions on Vehicular Technology, Wiley Wireless Communications and Mobile Computing, and International Journal of High Performance Computing and Networking, and so on, and on Steering Committees of the SIG of System EVAluation (EVA) of IPSJ, the SIG of DataBase System (DBS) of IPSJ, and the SIG of MoBiLe computing and ubiquitous communications of IPSJ. He has also served on the program committees for several international conferences includes ICDCS, INFOCOM, ICC, and GlobeCom.
