*Seminar*

**Information Engineering in the Information Age**  
By  
**Dr. C. K. WONG**  
Chaiman, iASPEC Technologies (Holdings)

**Date : 11 November 2022 (Friday)**

**Time : 10:00am to 11:00am**

**Venue : Rm801, Ho Sin Hang Engineering Building, CUHK**

*Abstract*

This current stage of the industrial revolution that has started to emerge after the WWII is transforming the world in all aspects. This new era commonly referred to as the Information Age is characterized by the gradual shifting from traditional industries to a new economy that is driven by information and the use of information. The talk is to review the impact of the Information Age on the various societies. More importantly, how young students in Hong Kong can become better prepared in facing the challenges and opportunities of this Information Age.

*Biography*

Dr. Wong is the founders of the iASPEC Technologies group of companies. The group operates a number of software companies in Hong Kong, Mainland China and the United States since 1988. These companies provide IT products and services in the Financial Services, Healthcare and Cyber Security areas.

Dr. Wong obtained his Ph.D. degree in Mathematics from the University of California, Berkeley. After teaching at the University of California, Davis for two years, he moved to the private sector as a consultant. While serving as the Principal Architect in a State of California government data center, he received the Distinguished Services Award from the California Government for his contribution in complex information system design work.

Dr. Wong returned to Mainland China in 1982 and has served as consultant in a number of state-operated organizations. He contributed to the design and development of indigenous computers hardware and software in China in the 1980s. He returned to Hong Kong in 1987 and founded the first iASPEC company the following year.

Dr. Wong is a Distinguished Fellow of the Hong Kong Computer Society. He received the Medal of Honor from the HKSAR government in 2014. He is the Chairman of the Advisory Committee of Department of Information Engineering, The Chinese University of Hong Kong since 2010.
